SYMBOLS

	Code		Worked Example
	Graph		Exercise
	Definition		Numerical Method
	Theorem		Analytical Method
	Remark		Theory
	Information		Hint
	Warning		Solution

🏷️ CONTROL THEORY

A field of Mathematics that deals with the

- **modelling**,
- **analysis** and
- **control**.

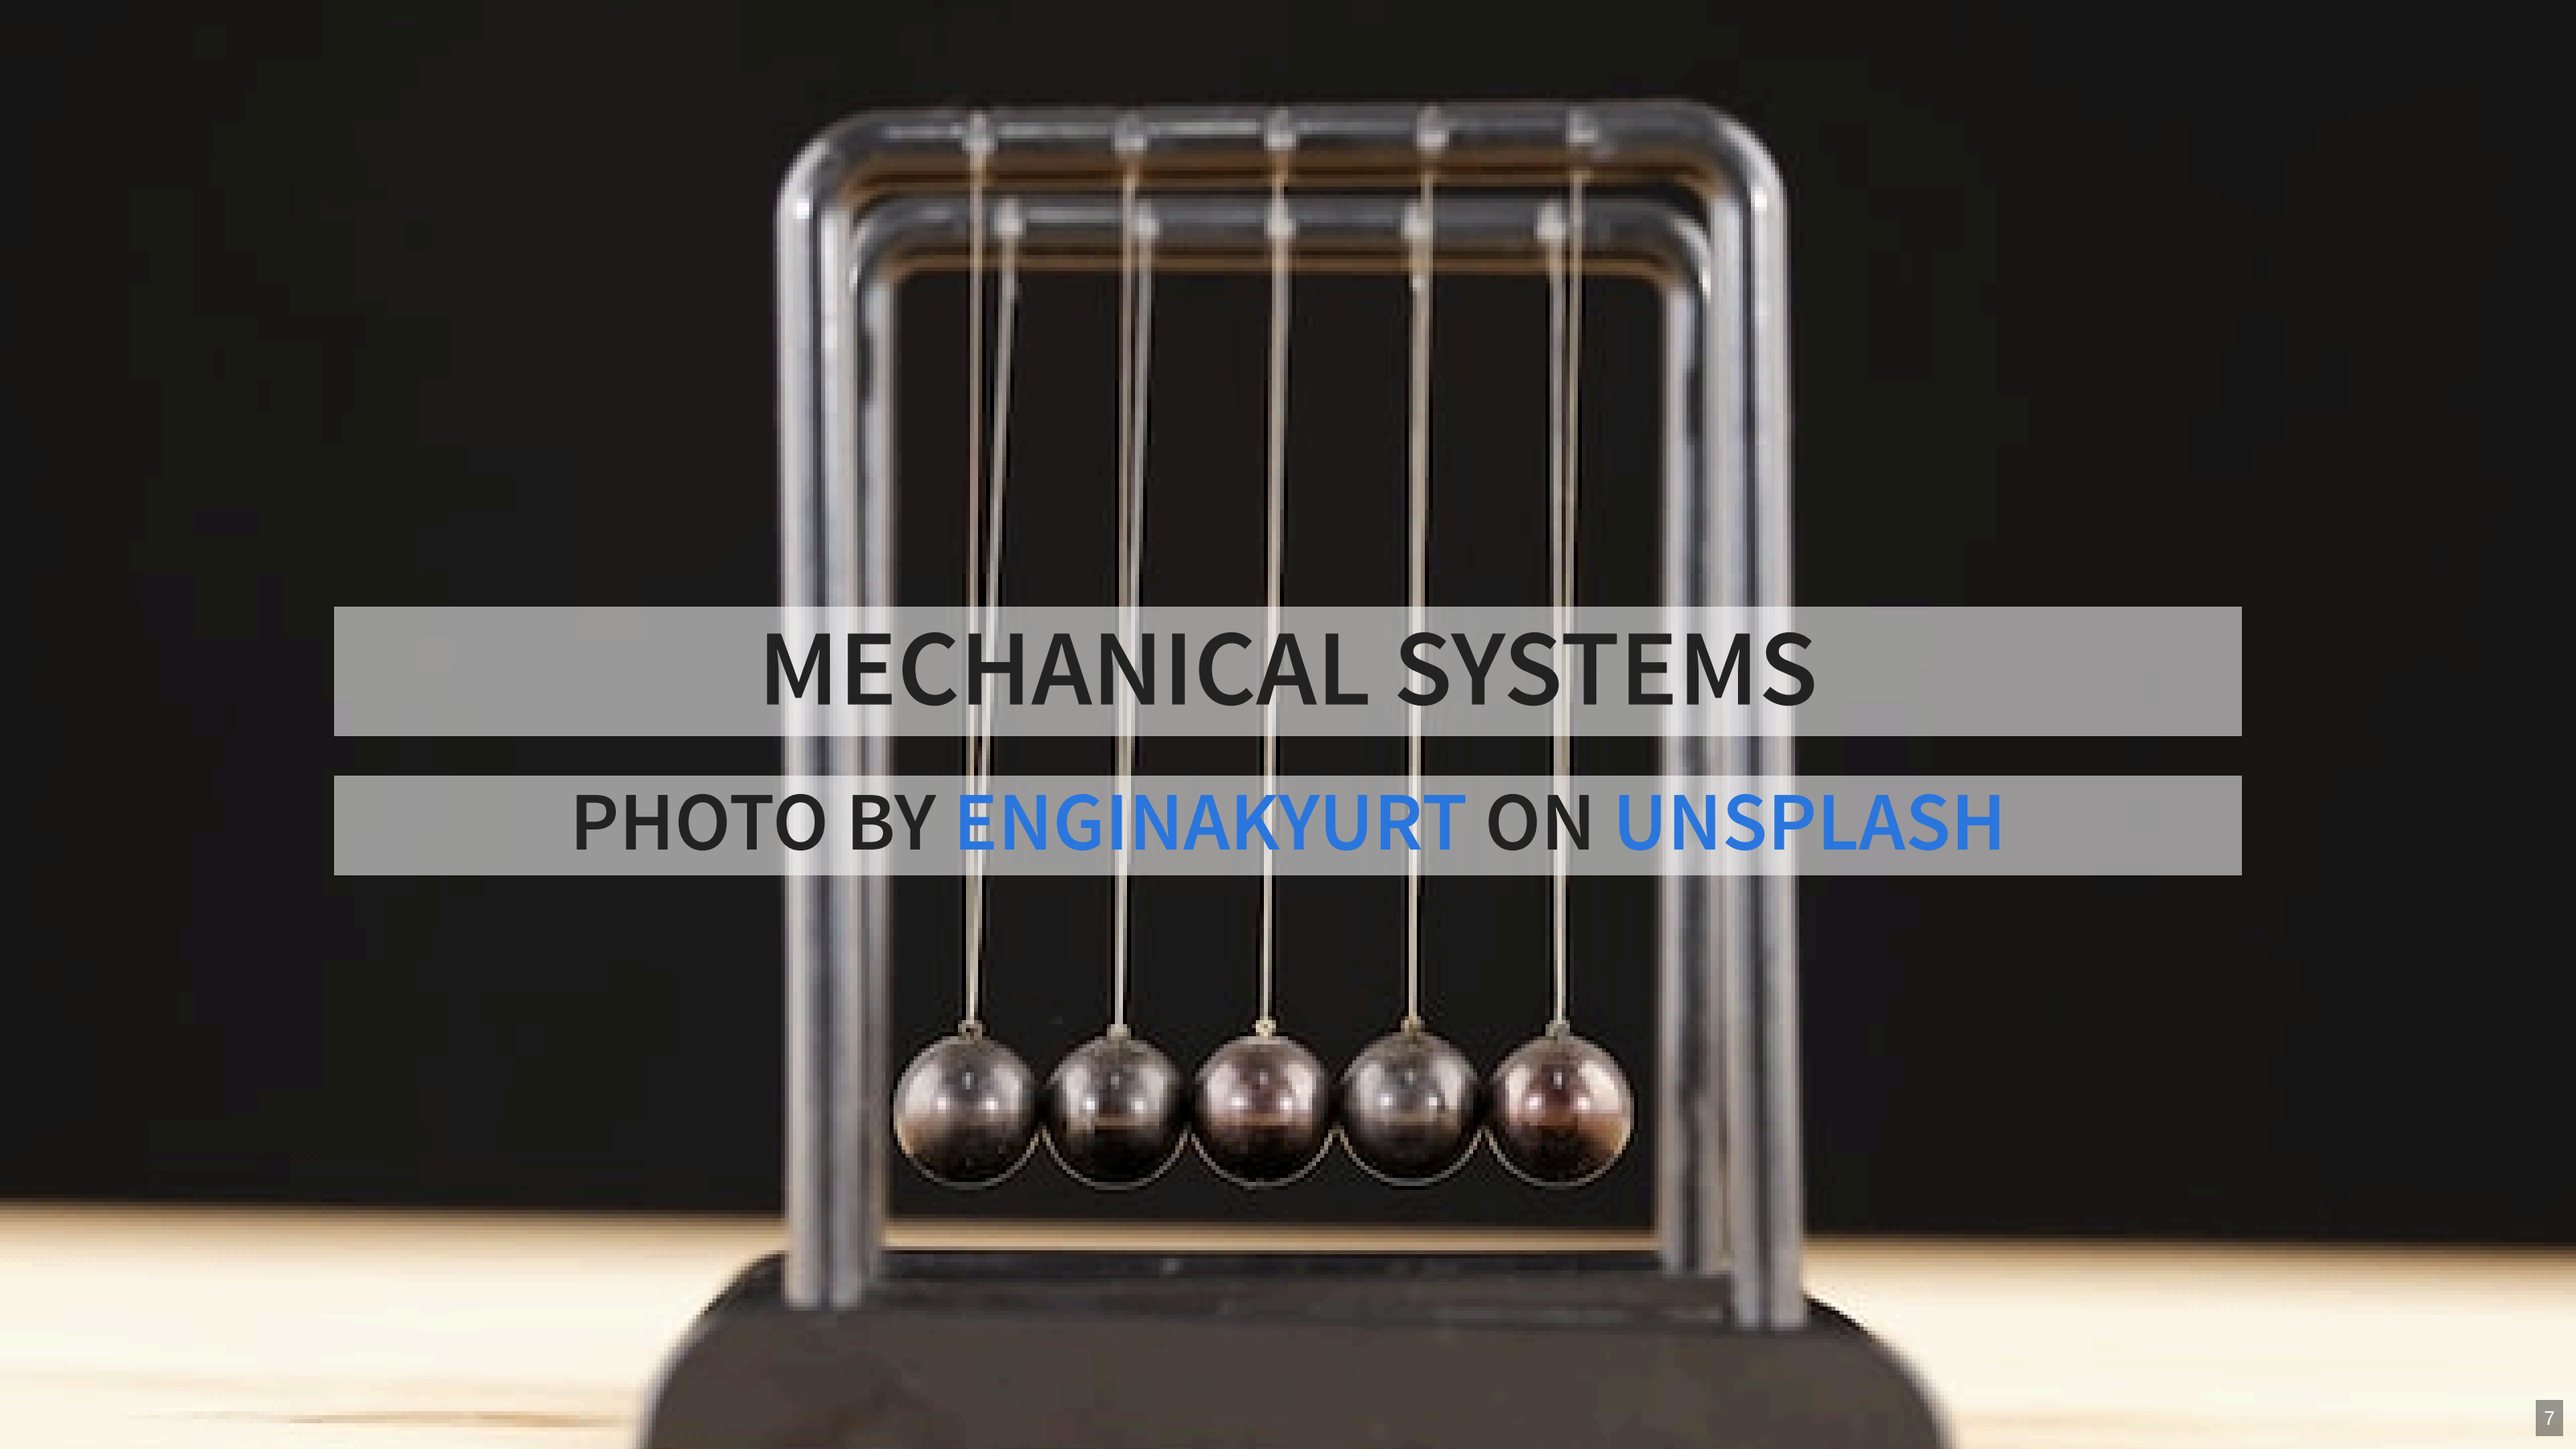
of abstract **dynamical systems**.

🇺🇸 Control Theory $\longrightarrow$ 🇫🇷 **Automatique**.

🏷️ DYNAMICAL SYSTEMS (ABSTRACT)

- Described by a set of time-dependent variables,
- which are governed by mathematical equations,
- that connects the system past, present and future.

EXAMPLES



MECHANICAL SYSTEMS

🏷️ CONTROL ENGINEERING

Apply Control Theory to **design & build** concrete dynamical systems with specified behaviors.

Overlaps with and complements:

- 🔌 Electrical Engineering
- 🔧 Mechanical Engineering
- 🖥️ Software Engineering
- …

APPLICATIONS

ROBOTICS

POSSESSED PHOTOGRAPHY ON UNSPLASH

🤖 OR 🧑?

Consider:

- 💸 Cost analysis
- 🎨 Creative/complex work?
- 🦾 Strength, speed, precision
- 🏜️ Hostile work environment

MANUFACTURING

Automated Manufacturing Robots - FABTECH

EUROFIGHTER TYPHOON

PHOTO BY RAY HARRINGTON ON UNSPLASH

- twin-engine, canard delta wing, multirole fighter
- air superiority fighter / agile / dogfighter
- ⚠️ **aerodynamically unstable in subsonic flight!**

“The design of the Typhoon is such that without input to any control surfaces the aircraft will pitch up during flight extremely quickly.”

“Although this improves the agility of the aircraft it also requires a system to enable controlled flight to be maintained.”

“This is achieved through the Fly By Wire 🏷️ **Flight Control System** […].”

“With this system the pilot has no direct link to any of the aircraft’s control surfaces.”

“Instead, **all movements of the throttle, stick or pedals are interpreted by the FCS and an appropriate control response taken.**”

BOEING 737 MAX

PHOTO BY JUSTIN HU ON UNSPLASH

BOEING 737 MAX

4th generation of Boeing 737.

Larger and more powerful engines.

→ ⛽ fuel consumption reduced by 14%

→ 💸 profit!

→ ⚠️ engines located further forward and higher

→ ⚠️ pitch-up tendency that needs to be controlled

→ 🏷️ **Maneuvering Characteristics Augmentation System (MCAS)**

FATAL CRASHES

✈️ **Lion Air Flight 610** (2018, Indonesia)

“MCAS pushing the aircraft into a dive due to data from a faulty angle-of-attack sensor.”

✈️ **Ethiopian Airlines Flight 302** (2019, Ethiopia)

“Evidence suggests, that […] the aircraft was configured to dive, similar to Lion Air Flight 610.”

→ 🛑 **global 737 MAX groundings.**

ROCKET BOOSTER LANDING

🚀 SPACEX'S STARSHIP

ADAS & SELF-DRIVING CARS

🏷️ **ADAS:** Advanced Driver-Assistance Systems

📅 **2025:** fully autonomous cars are not there yet.

Actors: Tesla, Mercedes-Benz, Waymo, etc.

SAE AUTOMATION LEVELS

🏷️ **SAE** : Society of Automobile Engineers

- **Level 0:** 👨 No automation: warnings, alerts, etc.
- **Level 1:** 👨/🤖 single-task assist (e.g. speed control)
- **Level 2:** 👨/🤖 many-task assist ← Telsa Autopilot
- **Level 3:** 🤖/👨 ← Mercedes Drive Pilot (2021)
- **Level 4:** 🤖 ← Waymo (2022), Mercedes (2024 🔧)
- **Level 5:** 🤖 fully self-driving ← 🚀 Not achieved yet

LEVEL 1 ADAS

Single feature automation.

- 🏷️**CAS: Collision avoidance systems**
- 🏷️ **CC: Cruise control**

🏷️ ACC: CAS + CC

ADAPTATIVE CRUISE CONTROL

🏷️ ESC/ESP

ELECTRONIC STABILITY CONTROL
